F.F.A. PARTS MANUFACTURER APPROVAL

March 25, 1966.

Mr. Thurman Baird
106 Arthur Road
Ashville, N.C.

Dear Mr. Baird:

Enjoyed talking with you over the phone and was sorry that you could not make a change and join forces down here in Florida, However; I will be looking forward to your promised visit in the near future.

I just aquired a Baby Ace, complete and in flying condition. It was built up in Ohio and the fellows I purchased it from delivered it by trailer last Sunday. We set it up and after quite some doings, was able to pour my 200 lbs. into the cockpit and enjoyed a few minutes flight in a Baby Ace after all these years.

We are going to put a set of Corben North-Aire Floats on this Ace and run some flight and water tests on it. We will take pictures both of the float installation as we go along, and also pictures of the flight tests, these will be available to you should you care to include them in your brochures at a latter date.

It may be of some help, if you can send me down a set of plans for the Ace, in exchange I will give you a three view drawing of the Baby Ace on our floats to include with the sale of your plans. This might be a way to help the sale of both the plans and the float kits .

Will send you a couple pictures of yours truly seated in the Ace just as soon as I get some good ones.

Awaiting your reply with interest, I am

Yours very truly

O.G. Corben
