Dear Mr. Baird:

Sorry for the delay in forwarding this massive however I have been busy as usual and there appears to be no let up at the plant I still do not have any of the items we spoke about started and do not know how soon I can start. With work as it is for me. I do hope that you made the trip home alright with no loss of any of the parts and that every thing is satisfactory.

It certainly has been wonderful to meet you and the family. I would also like to have a set of Baby Ace drawings for future reference on this ship as regards to the components I intend to manufacture. So will you oblige and forward a set and I will forward you a check for same with out delay. Thank you.

With best personal regards

Carl A. Walters
